FEDERAL EMPLOYEE HEALTH BENEFITS FOR MILITARY RETIREES: CHAMPUS coverage for military retirees is automatically transferred from CHAMPUS to Medicare coverage upon attaining the Medicare eligibility, at age 65. Employees have 31 days from the date of loss of CHAMPUS to enroll in a Federal Employees Health Benefit (FEHB) plan. Military retirees who are thinking about retiring from civilian service before reaching Medicare eligibility are reminded: to have FEHB coverage as retiree, an employee must be enrolled at the time of retirement; to insure coverage, they should enroll in an FEHB plan that takes effect before the retirement date elected. To keep FEHB after retirement, employees must be enrolled for at least 5 years; and coverage under CHAMPUS counts towards eligibility to carry FEHB into retirement. Questions regarding health benefits should be referred to Kathleen Ellis (867-2002), or Lisa Fowler (867-1883), Benefits Team, Personnel Office, Headquarters Building, Room 2506. (BA-B)

KSC/CCAFS HEALTH EDUCATION & WELLNESS PROGRAM (HEWP): January 2005 Weight Loss

Whether you are concerned about losing holiday pounds or have wanted to lose weight for some time, you need to educate yourself about the basics of weight loss. The January 2005 HEWP packet focuses on weight loss including making sense of body weight, how much weight you should lose, popular diets, weight management guidelines, food substitutions, grocery shopping, overeating triggers, physical activity and more. The packet is available on the HEWP website: <http://sgs.ksc.nasa.gov/sgs/sites/other/chs/omehs/occmed/home/index.cfm?page=hew>

Hardcopies of the packet will also be available at all medical and fitness facilities. If you or your department/organization would like to be added to the monthly packet hardcopy distribution list, please call Kris Calderon at 867-3414.

WOMEN'S HEALTH TOPIC: Hypothyroidism

The Women's Health topic for the month of January is Hypothyroidism. Hypothyroidism or "under-active thyroid" is a very common autoimmune disorder in women affecting 3 out of every 100 women. It is important to know the signs of hypothyroidism because the lack of the thyroid hormone can lead to serious problems of the brain, heart and other organ disfunctions, as well as a loss of energy. The hypothyroidism packet is available on the women's health webpage: <http://sgs.ksc.nasa.gov/sgs/sites/other/chs/omehs/occmed/home/index.cfm?page=WomensHealth>

Please contact Heather Torbett at 867-4566; email Heather.Torbett@jbosc.ksc.nasa.gov or Kris Calderon, 867-3414; e-mail Kristine.Calderon@jbosc.ksc.nasa.gov with input for other Women's Health Program topics.
